

Cura

Overhead Healthcare Lighting

Purposeful Lighting for Better Care

A photograph of a modern hospital room. In the foreground, a patient bed with a grey frame and a light blue blanket is partially visible. To the left of the bed is a tall, dark metal IV stand with two hooks. In the background, a large window with a white frame looks out onto a bright, modern building with large windows. To the right of the window, there are vertical wooden slats and a sheer curtain. The overall lighting is soft and even.

Designed Around Care.

Cura redefines patient room lighting with a refined, modern design and versatile illumination for today's healthcare environments.

Selectable CCT and configurable uplight, downlight, or combined illumination provide exceptional flexibility for patient comfort, clinical care, and caregiver tasks.
