

BRILLIANCE SERIES
SLIM PROFILE
RECESSED POT LIGHTS

LOW PROFILE WITH STYLE

Transform any commercial or multi-family residential space with the Brilliance Series range of LED Slim Pot Lights. Designed with a sleek, low-profile look and offered in multiple form factors, these modern fixtures fit seamlessly into any ceiling—even in tight spaces where traditional lighting won't.

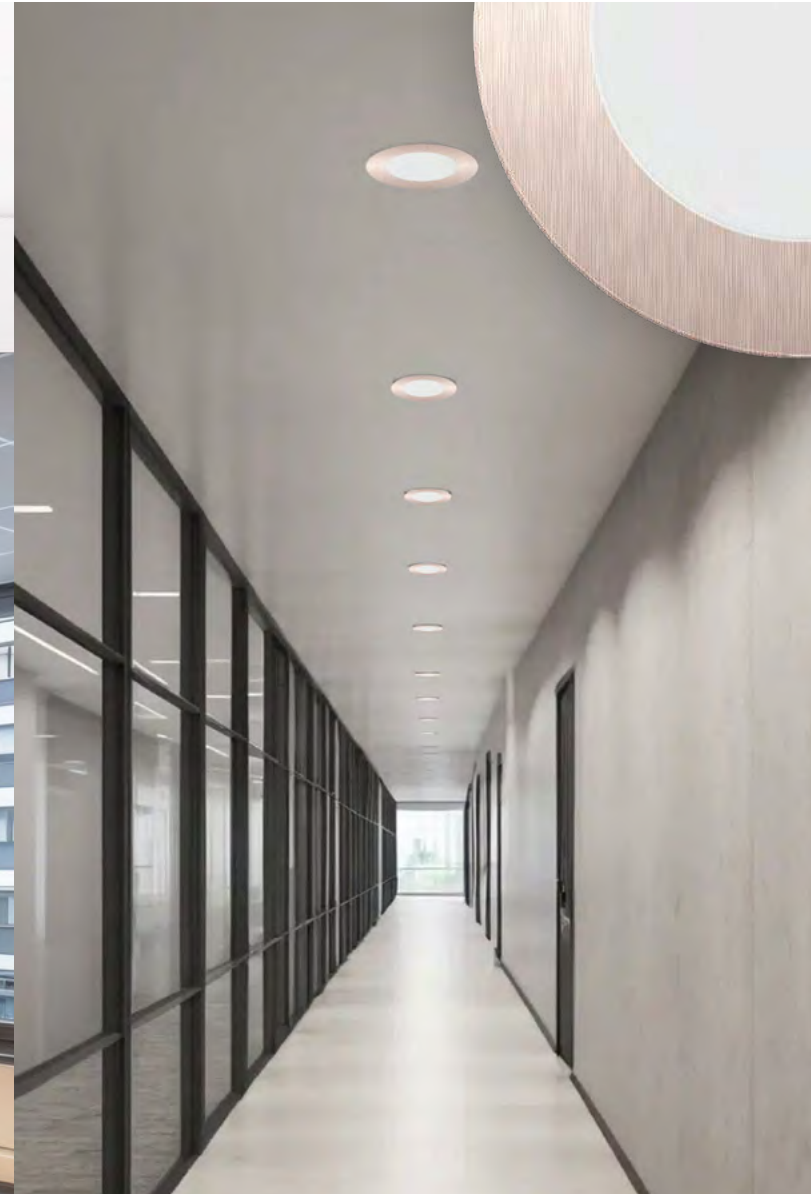

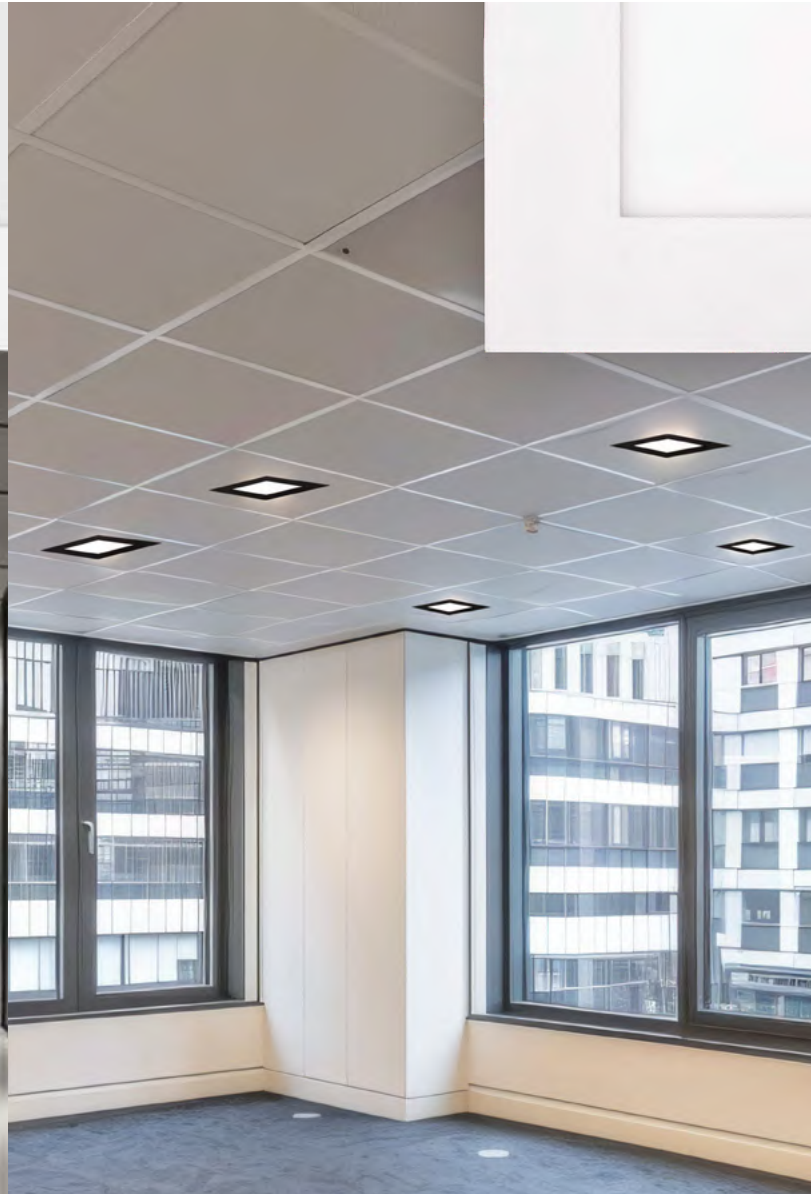

KEY FEATURES

- Low-profile design to fit ceilings with limited clearance
- High efficacy, Energy Star-rated performance
- 5 CCT Selectable built-in (27/30/35/40/5000K) >90 CRI (Square, Baffle, and Magnetic styles)
- TRIAC Dimming for wider dimmer compatibility
- IC-rated and Air-Tight ready and may be in direct contact with insulation
- 120V (277-347V drivers available for Round, Square, and Baffle models)
- 4" octagon j-box or recessed housing installation (Slim Magnetic Trim model)

STYLES FOR
**EVERY DESIGN
& FUNCTION**

Available in four distinct styles with options in various trim finishes and sizes, the Brilliance Series offers maximum flexibility for creating the perfect ambiance. Whether it's the classic round look, the modern square design, the glare-reducing baffle, or the customizable magnetic trim, our wide range of options lets you choose your style.

ROUND SLIM

Offers a classic, timeless design that blends seamlessly into any ceiling, providing even light distribution ideal for both general and ambient lighting environments.

SQUARE SLIM

Brings a modern, geometric aesthetic that adds a distinctive, architectural touch to any space. Their sharp lines create a striking contrast to traditional round fixtures, making them a perfect complement to other square or rectangular elements.

ROUND MAGNETIC TRIM

A unique retrofit solution that enables 4" octagon j-box or recessed housing installation, while introducing a sleek, modern design with customizable trims that allow for easy updates to match changing interior styles without replacing the downlight.

BAFFLE STYLE

Designed with ridges or grooves that reduce glare and soften the light, making them ideal for areas where comfortable, gentle lighting is key. They also provide focused, precise illumination, perfect for task lighting or accenting specific areas.

LED SLIM POT LIGHT

The most popular Round Slim: a low-profile, easy-to-install pot light with integrated driver that delivers exceptional brightness while maintaining a sleek, modern look. Perfect for tight spaces, it is easy to install and offers optimum energy efficiency.

Order#	Model	Diameter	Wattage	Voltage	CCT	Lumens	CRI	Finish
R36008	RENO-3-S6W-345KWH	3.0"	6W	120V	30/40/5000K	400 lm	>80	White

R36017	RENO-4-S12W-MCCT-WH-SQ	4.0"	12W	120V	27/30/35/40/5000K	800 lm	>90	White
R36018	RENO-4-S12W-MCCT-BK-SQ	4.0"	12W	120V	27/30/35/40/5000K	800 lm	>90	Black

SLIM PROFILE; ROBUST DESIGN

SLIM MAGNETIC TRIM

With a swappable magnetic trim design (White included, changeable to Black or Brushed Nickel with trim accessories), this modern take on the round downlight is the perfect solution for enhancing the look of a space. Combine this with a unique design that allows for either a 4" octagon or recessed housing installation, and you have the perfect choice for any retrofit project.

Order#	Model	Diameter	Wattage	Voltage	CCT	Lumens	CRI	Finish
R36019	RENO-4-S8W-5CCT-MRL-WH	4.0"	8W	120V	27/30/35/40/5000K	650 lm	>90	White
R39110	RENO-4-MRL-TRIM-BK	4.0"						Black
R39111	RENO-4-MRL-TRIM-BN	4.0"						Nickel
R36112	RENO-4-MRL-CLIPS							Butterfly Clips (for recessed housing installation)
R36113	RENO-4-MRL-E26							Downlight Housing Retrofit Kit (E26 base adaptor)

SLIM BAFFLE STYLE

Its grooved baffle trim reduces glare by directing light downward, the Slim Baffle style potlight is perfect for spaces where minimizing brightness and reflection is a priority.

Order#	Model	Diameter	Wattage	Voltage	CCT	Lumens	CRI	Finish
R36015	RENO-4-S12W-MCCT-BF-WH	4.0"	12W	120V	27/30/35/40/5000K	800 lm	>90	White

GOOF RINGS SAVE THE DAY

Also known as a "trim ring" or "oversize trim plate", a Goof Ring is a cover used to hide imperfections or gaps around the recessed light. Most common uses? When the hole cut for the potlight is too large, uneven, or damaged, and its trim doesn't fully cover the opening.

MOUNTING PLATES

Mounting Plates serve as the support structure that attaches to the ceiling joists or other structural elements, providing a stable base for the potlight to be installed. A must-have if you want to ensure the light is aligned and held securely in place.

EXTERNAL 277-347V DRIVERS

If your building voltage is not 120V, an optional 277-347V driver is available to accommodate higher voltage applications for the Brilliance Series Pot Lights.
