- Optional Photocell or Dimming MW sensor
- 10 Year Warranty
- R1, R2, R4, R5 models also available

*Mounting accessory not included.
Please add Trunnion, Slip Fitter or Straight Arm when ordering.

'Shoebox' Lights

LED Area Lights are still referred to as 'Shoebox' lights because the original HID/metal halide/high pressure sodium fixtures had the shape of a rectangle box with a housing that resembled a shoebox—hence the nickname 'Shoebox' lights.

'Traditional' Wall Packs

The word 'Traditional' refers to the form factor used to design HID wall packs that the industry has come to know and love. With the introduction of LED, the industry wanted an energy efficient replacement that kept the same look and footprint (for easy retrofits)—and the 'Traditional' LED Wall Pack was born.

'Full-Cutoff' Wall Packs

'Full-Cutoff' means there is no upward light and the lightbeam is only directed downward, reducing light pollution and making the luminaire eligible for DarkSky compliance. This is why 'Full-Cutoff' has become an important term for lighting professionals.

R51026

RENO-WP-MW-DV-MCCT-R3
Traditional Glass Wall Pack

- Multi CCT 3/4/5000K
- Mult Wattage 72/96/120W
- 9,720/12,960/16,200 lm
